

Möbel

Møbel

Møbel Copenhagen is a furniture studio founded by the Agersborg family. At Møbel we celebrate the classic design virtues – craftsmanship, functionalism and honest materials – but insist on being bold, looking forward and offering furniture designed for today and for the days to come: The classics of tomorrow.

Foundation

Each design is crafted with care from the finest materials following traditional as well as innovative methods. By bridging the Danish design tradition and innovation – we create designs that display curiosity and courage, made to last for centuries.

Sara Agersborg, Founder

”We create and curate modern furniture for people who are inspired by Nordic simplicity and who value functionalism and honest materials”

Values

With a strong belief in co-operation and co-creation, every piece of furniture is created and curated in collaboration with visionary, skilled and kind people who share our love for beautiful, vibrant design, functionality and innovation. The close personal contact with all suppliers and clients makes it possible to offer highly flexible and customized material solutions. The majority of the furniture components are customizable with different colors and materials, offering a large versatility of the designs to different ambiances and interior design approaches.

Lean by Gamfratesi

The Lean collection is an example of traditional craftsmanship applied to a modern design: an upholstered shell in a minimalistic shape leans on a solid oak supporting structure – that can be stained or left natural. The Lean lounge chair and sofa brings the signature of the design duo GamFratesi, whose combination of Danish and Italian design approach is synthesized in the collection.

The Lean collection combines appealing design with outstanding comfort. It comprises a lounge chair and sofa, available with or without cushions.

Cuba by Furnid

A functional stool inspired by Cuban lifestyle and culture, whose wooden details are the result of highly advanced Scandinavian manufacturing techniques. When creating Cuba, it was essential to develop a design with substance that ends up as original and reaches beyond a certain artistic trend and its limitations.

With an emphasis on contemporary craftsmanship and construction, Cuba was created by the Danish design duo FurnID, who has been operating for over twenty years by creating timeless and minimal pieces crafted from the highest quality material.

Skudo by Gamfratesi

Skudo is comfortable, stackable, durable and moves seamlessly from space to space. The double shell chair, designed by GamFratesi, is an elegant and modern reinterpretation of a classic 50s harmonious shape. While following this strong aesthetic reference to the 50s Classics inspirational source, the two shells are supported by a thin metal frame producing a dynamic line around the chair.

For these reasons, Skudo fits perfectly into a variety of public and private contexts as an office chair, a dining chair or an elegant conference chair

Pair by David Thulstrup

The Pair collection consists of three different variations of a pair of tables, with one table overlapping the other to create a contrast of solid materials and surfaces. The lower base table is uniquely crafted in glazed ceramic, while the higher table is made of matt powder-coated steel and stands light on its three feet. The base table can be placed either beside the higher table, providing an additional surface, or underneath to create storage in between. Each ceramic piece is uniquely handcrafted and the glazing - which creates a glossy irregular surface - guarantees a limitless combination of textures and surfaces with an appealing graphical effect.

David Thulstrup

”The two paired tables are made respectively of ceramic and metal, two different and honest materials which work unexpectedly well together: the soft and glossy ceramic creates an interesting contrast with the cold matt metal.”

Coat by Ulrik Nordentoft

Coat is a minimalistic and expressive folding clothes-stand made of six poles held by a metal ring. Conceived as a tribute to Danish simplicity and fun design, Coat is an easy-to-use playful object that enters immediately into a relationship with the user through its natural design expression. Coat can be hung with the notch facing inwards or outwards – as you prefer. It is easy to dismantle to store and to then unfold again to be placed wherever needed.

Lili by Takumi Hirokawa

Lili Lounge tables is a well-balanced mix of Danish craftsmanship and Japanese aesthetics that unifies to an appealing minimalistic design. With a distinctively appealing sculptural shape, Lili is inspired by its water lily namesake. A harmonious connection between its tabletop and frame creates an elegant curve made possible by precise construction and assembly techniques.

Angel Stool by Gry Holmskov

A sculptural stool with a poetic shape evoking an angel with its wings widely spread. The Angel stool consists of a minimalistic seat and a base of steel rods. It is a decorative yet comfortable piece that can be used as either a stool or a freestanding, agile, sculptural object to decorate indoors or outdoors.

Angel is the perfect example of efficient use of eco-design strategies: it is made of one single material, making it easy to recycle while minimizing the number of links in the supply chain.

Angel table by Gry Holmskov

A light minimalistic side table that compliments the Angel stools. The bearing structure, which is made of steel rods, remains visible through the tempered glass table top making the table seem light and elegant. The table top is neatly integrated into the metal structure to produce a seamless piece. The Angel side table is created with a Scandinavian approach to crafts, simplicity and functionalism while also carrying a strong embedded story and associations expressed in a minimalist idiom.

Gry Holmskov

”Angel is created by relating to the sculptural shapes of the human body. The design is elegant, classic and timeless. The soft, organic language of shape stands in contrast to the solid, hard metal rod”

Font collection by David Thulstrup

The Font collection is a family of chairs, lounge chairs, barstools and sofas. The name of the collection refers to graphic fonts that inspire the varying thickness of the cushion and backrest: The lounge chairs and sofa are bold, the dining chairs are regular and the barstools and sofa are light.

LOUNGE SOFA

In spite of following the same design language, each typology is designed with its own requirement in terms of function and comfort. The comfort requirement increases from the 'Light Bar Stool' to the 'Bold Lounge Chair', which can be seen in the way the upholstered parts become thicker and bigger.

The Font collection includes eight design pieces in total. All chairs are available with and without armrest - the latter having a curved backrest which extends into the armrest, thus embracing the sitting person.

The furniture components can be changed, where different characters and options are achievable through the choice of textiles and colours, offering a large versatility of the design. The mirror polished steel is always polished by hand in order to avoid the use of chrome.

Beam by David Thulstrup

A beautiful and graphic table, whose exquisite quality and timeless elegance make it a universal table suitable for offices, restaurants and residential spaces. By combining three different elements in different materials, finishes and colors, a wide range of possible variations occurs. The design of the table is focused around the graphical detailing of the joinery. The wooden feet have a narrow cut which the metal frame is slid into, giving it a distinct and elegant expression.

Product overview

ANGEL STOOL
Designed by Gry Holmskov

Dimensions
W 45 cm, D 26 cm, H 46 cm
Seat height: 42 cm

Weight
3.9 kg

Materials
• Galvanized steel

Colors
• Black (RAL 9005)
• White (RAL 9010)
